|                      |     | Evergreen Japonicus (Low)                   |          |                |                                                                           |                              |
| EJH                  |     | Euconymus japonicus 'Jean Hugues'           | 20 300   | 2 litre        | Bushy, min. 7 No. breaks; planted in a double staggered row               | 5 No. / LM                   |

**Notes:**  
 Ornamental and ground cover shrubs to be 2/3 1/8" stock, planted at a density of 1 to 5 No. plants/m<sup>2</sup> depending on species.  
 Specimen plants to be planted.  
 Any planting within "Vision Scapey" shall be maintained below 600mm in height.

All shrub areas to be mulched to a depth of 50mm with "Mekong Ornamental Bark Mulch" (ref. product code 5000).

Two supports - short double staking (21x53x5 & 57x5 Ref. tree Bpf)  
 Everly moved - beds to be planted in single species groups of not less than 2-3m<sup>2</sup> (densities as per plant schedule), randomly mixed with other plants indicated at ratios stated throughout extent of bed/ area to create a mosaic planting arrangement.

## HEALTH & SAFETY INFORMATION

To be in conjunction with Viewpoint's Designer Hazard Identification Checklist - Risk Assessment for existing & proposed service positions see architects & engineers drawings. In addition, the following risks normally associated with the type of construction work, the following risks should be noted:

|                                                                                            |                                                                                                                                                                                                                     |
