Hi Phoebe,

Please see attached is the planning approved landscaping scheme that was used to install the scheme from that also includes the habitat box locations.

Many thanks,

Chris

Best Regards,

**Chris Chippendale** BSc (Hons) LGD, MALA, CMLI

Hi Paul,

Just waiting on the as-builts from Ground Control now. @Jack Whiting @Christopher Chippendale can you provide a timeline for when these will become available please?

Kind regards

**Phoebe Marshall** (She/Her) | **Viro** | Senior Sustainability Consultant

## On the road to net zero carbon by 2050

At Celotex, we are dedicated to creating a better world for everyone by providing sustainable solutions that address our customers' needs. Our sustainability roadmap outlines our plans for the next few years, including the improvements we've made and milestones we've reached so far.

### U-value Calculator

[Home](#) / [Sustainability](#)

We're committed to preserving the planet by achieving net-zero carbon emissions by 2050.

### Strengthening Our Environmental Impact with SOPREMA

In collaboration with SOPREMA, we've significantly strengthened our sustainability initiatives. Together, we have developed comprehensive action plans extending through 2025, all aimed at advancing towards our goal of net zero carbon by 2050.

SOPREMA is dedicated to pioneering sustainable solutions within the building sector. As a leader in manufacturing construction products and materials, SOPREMA actively contributes to sustainable development by addressing environmental, social, and economic challenges. The company is committed to protecting the environment, combating climate change, and enhancing health and well-being. SOPREMA integrates a systemic approach inspired by lifecycle analysis, ensuring that its strategies and actions are coherent, sustainable, and beneficial for both present and future generations.

The energy used in the production of PIR insulation is relatively small compared to the ongoing energy savings it provides over its lifetime. Studies and industry data typically show that the energy savings can be more than 100 times the energy consumed during the manufacturing process.

All Celotex products are manufactured under an Environmental Management System which is aligned with ISO 14001 standards. BRE Global Green Guide generic specification achieves a summary rating of A. Global Warming Potential (GWP) Less than 5 and zero Ozone depletion (ODP)
