

GENIECLIP® LB2

Resilient sound isolation clip with extended steel bracket used as a stand-alone system or in conjunction with a **GenieClip RST** wall or ceiling system. Extends or reduces the profile space between the plasterboard layer and floor joists or wall studs and provides support at the wall termination of **Pliteq® Furring Channels**.

Improves low and high frequency sound control performance. Reduces impact noise in floor-ceiling assemblies. Allows for thinner and even no resilient mat used in certain floor-ceiling assemblies.

Levelling a Wood Joist Ceiling
