

Servicing Details for Weldale Street Commercial Unit

The commercial unit will be used as a café, therefore deliveries will be limited to coffee machine consumables and vending machine stock.

Deliveries

Delivery vehicles will be directed to the under-croft carpark, with a height restriction of 2.1 metres. Delivery companies will be advised in advance by the on-site management of the height restrictions.

Drivers will contact reception via the intercom next to the roller shutters, a member of staff will open the roller shutter and show the driver to the designated parking space and building entrance. The entrance leads to a lift which can be used to access the ground floor with deliveries then taken into the commercial unit. As there are staff based at the site at all times, any delivery staff will be escorted through the building into the commercial unit.

Waste and Recycling

Commercial waste will be collected by the site team and placed in the designated bin which will be clearly labelled; collections will be organised via Reading Borough Council's Trade/Business Waste Services. At the current time waste collections on the site are highly managed with staff taking the waste to designated collection points on the correct days and it will be no different for the commercial unit.
