

Burns, Matthew

Subject: FW: Ref 22630 - SBEM - Tower 42, Old Broad St. London, EC2N 1HQ

Hi Steve,

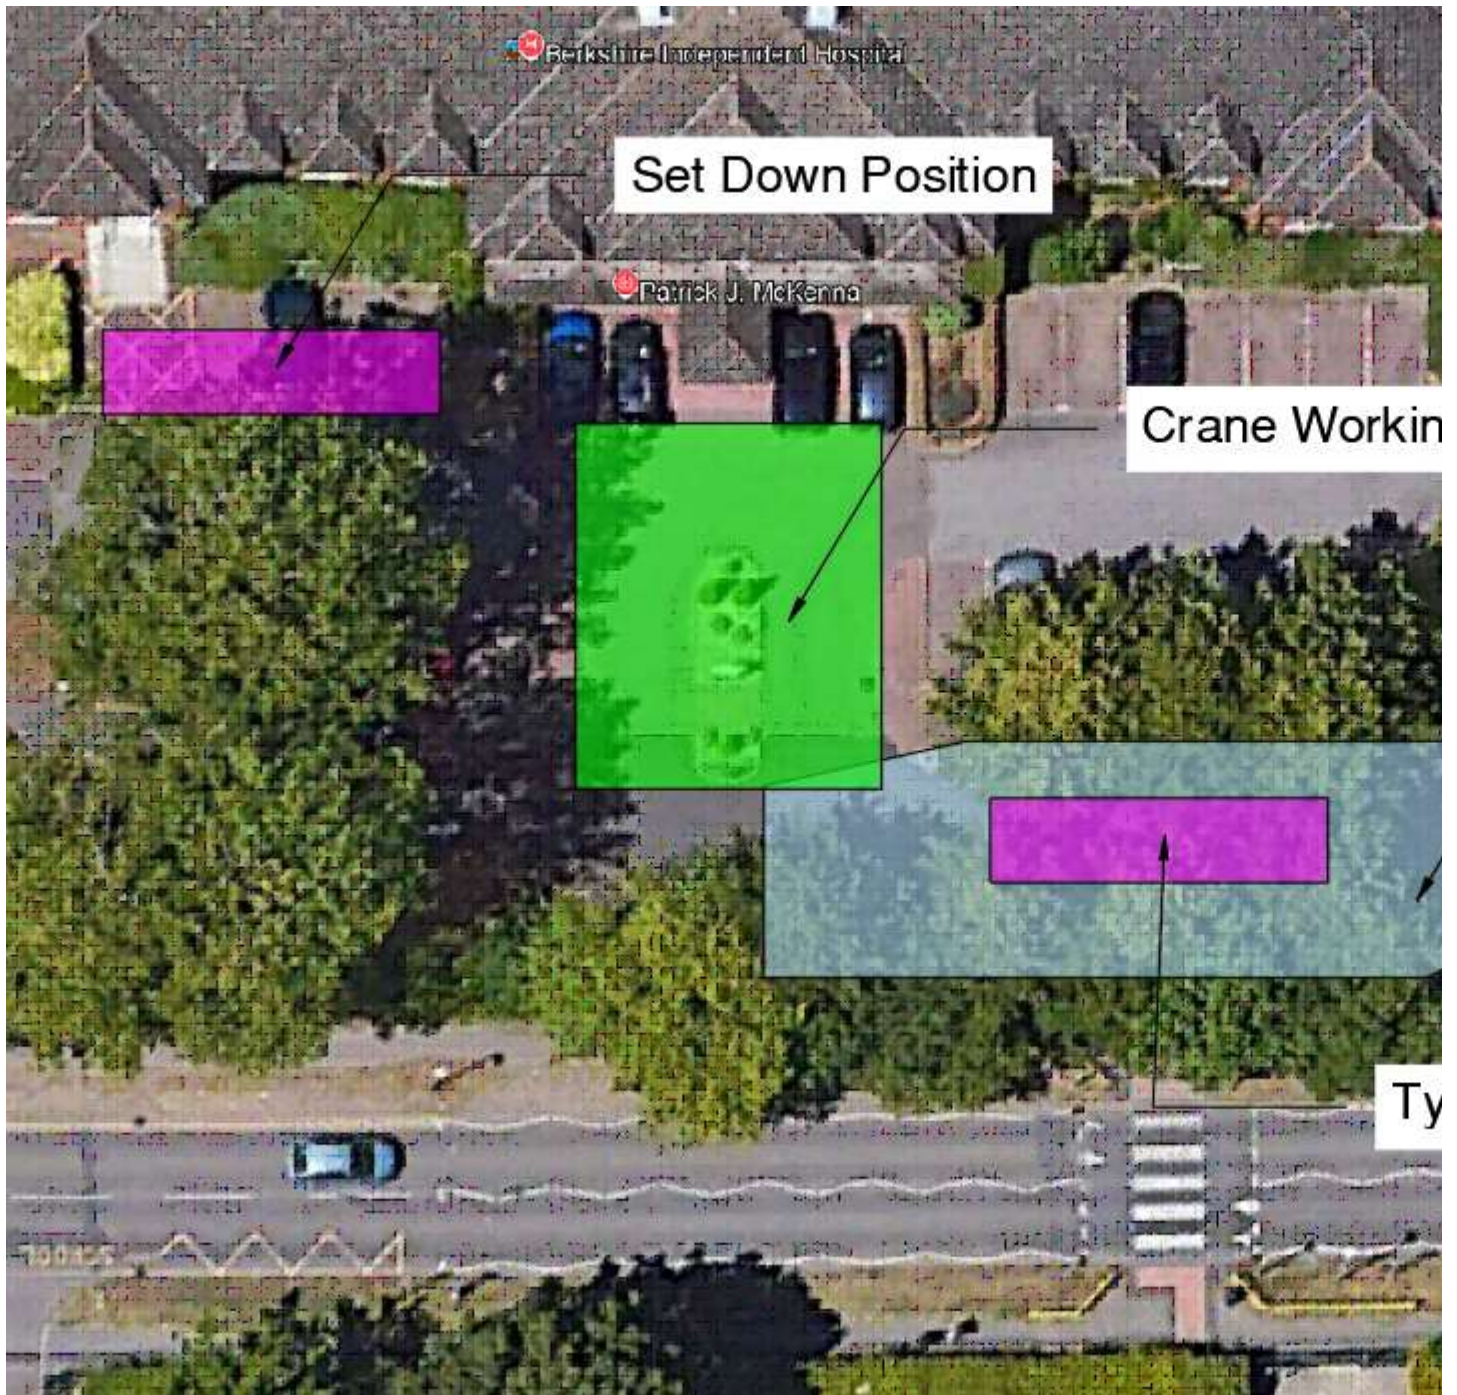

Apologies for the delay, I've just had the below sent to me:

Please see below crane plan showing set up position, MRI pick & install location.

I have shaded an area we would need to tree cut back, crane height 4m, so 4.5m clearance would be advised (Road + Pavement width).

Our crane is not as wide as your units so you may need extra space.

We would need full height clearance in the pick area, so no branches overhang the lift.

Access road (Tree cut back full width road & pavement to min 4.5m clearance)

Any overhanging branches directly above set down area to be removed.

(At time of visit, it looked ok, but there could be more growth)

Island, signs, tree to be removed and area made suitable for crane set up.

Note: Crane will need to set up on block paving, client would need to confirm ground suitable for crane axle & o/rigger loadings.

I hope the above is acceptable, should you have any queries, please let me know.

Kind regards,

Denise
