

Waste and recycling storage – location of these are shown on the supporting plan 63 002

Details below,

B. Refuse store details

The practical design features top hinged lids and side hinged front doors to ensure easy access. All timber is FSC® certified. Attractive features include slatted cladding to the front and sides. The main framing is strong ex 3"x1" timber. Another quality feature is the powder coated steel threshold for greater rigidity with minimal upstand to ensure ease of use. Preservative treatment is also included. Large prefabricated panels simplify the installation. Instructions are supplied for DIY self-assembly.

- Specifically designed for wheelie bin storage with no timber floor to provide easier access. Can be built on concrete, slabs, or shingle.
- All timber used in the construction of this product originates from sustainable forests
- FSC 100%, FSC certified timber throughout, certificate code INT-COC-003944(259), licence number FSC-C109654
- To verify our FSC membership visit the [FSC Member Search](#) and search for **Summer Garden**
- All timber treated with a light-coloured preservative
- Easily painted in any other colour of your choice
- For best results a top coat is recommended soon after installation

- All timber construction with no chipboard, plywood, OSB or other man-made boards or sheet materials
- Attractive slatted design features gaps to provide ventilation for hygienic reasons
- Unusually narrow gaps ensure an effective screen with an attractive overall appearance
- Side hinged front doors included with sliding bolts
- Top hinged lids with securing chains included
- Attractive horizontal timber slats to the front and both sides with narrow gaps
- Attractive horizontal timber slats to the lids with narrow gaps
- Timber diagonal bracing at the rear in lieu of slats to provide greater rigidity
- Ideally suited to a location against a wall or a substantial fence
- 34mm wide black powder coated steel threshold with minimal upstand and pre drilled holes
- 60mm x 20mm main framing (ex 3" x 1")
- 60mm x 38mm central internal support posts (ex 3" x 1.5")
- 42mm x 20mm roof framing (ex 2" x 1")
- 48mm x 10mm slats to walls (ex 2")
- Side panels 805mm wide x 1140-1180mm high
- Doors 605mm wide x 1035mm high
- Clear opening width approximately 2'0" (600mm) per opening
- Clear opening height approximately 3'9" (1140mm)
- Overall depth approximately 2'8" (805mm)
- Overall width approximately 6'6" (1995mm)
- Overall height approximately 3'11" (1190mm)
- These wheelie bin stores are easy to deliver if access is restricted - all sections will pass through a normal single door
- Prefabricated panels make installation easier

3x bins per property – general waste refuse, recycling and plastics, food waste

Condition 9 – cycle storage details

6'4 x 2'9 Trimetals Ramped Metal Bike Shed - Anthracite 1.96m x 0.89m

Specification

Brand	Trimetals

Size	6' x 3'
Guarantee	25 years

Height	1330 mm / 4 feet 4.36 inches
Height at Back	1290 mm / 4 feet 2.79 inches
Height at Front	1090 mm / 3 feet 6.91 inches
Internal Depth	1000 mm
Internal Width	2000 mm
Locking System	Two padlock Points (Padlocks not included)
Roof Style	Fully Opening Lid
Treatment	Galvanised
Width	2100 mm

security for up to 3 adult bicycles and is supplied with an extraordinary 25-year panel guarantee.

This metal bike shed is built in the UK from PVC-coated galvanised steel, so is robust, impervious to rust and suitable for all manner of other garden storage. Completely fire-retardant, this bicycle store can be used, not just in your garden, but at caravan parks too, as it meets their strict regulations for non-combustible storage.

This bike storage shed also features an integral ramp, built from a 1-piece aluminium plate, with reinforced metal hinges, which will comfortably support both you and your bicycle, even if it's a heavier electric bike. When you need to use the ramp, you can simply drop it into place. Afterwards, it folds back up to form part of the integral metal base. It really is that easy to use.

When in the stored position, the ramp is hidden from view, so cannot be tampered with from the outside but, for even greater security, you can padlock it to the door. Furthermore, fixings are included so that you can bolt your new metal bike shed's base to a wider concrete or paved base, for maximum stability and security.

You can gain incredibly easy access to your bikes thanks to a spring-assisted, concertina-style opening, which is a unique and patented design. That's not to say anyone can take them, of course, because 2 padlock points come as standard (padlocks not included), so rest assured that your valuable bikes will be completely safe from unwanted attention.

Don't just take our word that this is a secure bike shed because it comes highly recommended by the UK's cycling press too. Furthermore, Trimetals metal storage sheds are the only metal sheds endorsed by the Royal Horticultural Society.

Remarkably strong and secure, this outdoor bike storage shed is eye-catching too, for the unique design and contemporary anthracite finish make for an extremely attractive appearance. No maintenance is required, saving you money and leaving you more time to enjoy your bike rides.

All the major components are pre-assembled and clear, step-by-step instructions are included to help you achieve a straightforward assembly.

You can purchase this premium bike storage shed in anthracite, cream or green, with or without the ramp. Various optional upgrades are available too, including an exterior-grade plywood floor; a

stainless steel and brass hasp and padlock set; and a solid brass padlock, with a hardened steel shackle, two keys and a 5-year guarantee.
