

**Addendum to Heritage Statement**  
**Reading Crown Court**  
9566 / Rev P01  
March 2026

**9566 Reading Crown Court - Addendum to Heritage Statement  
56379-9573-FMW-RCC-XX-RP-A-0009-S2-B0700****Revision: P01****Listed Building Consent for Amendments to Planning Permission ref: PL/24/1462 and LBC PL/24/1465**

This addendum has been prepared in support of a Listed Building Consent application submitted on behalf of His Majesty's Courts and Tribunals Service (HMCTS). It should be read in conjunction with the previously submitted Heritage Statement approved under applications PL/24/1462 and PL/24/1465.

The application seeks consent for minor design amendments to the approved scheme, specifically to update the number and arrangement of external ventilation penetrations on the west elevation of the south wing, along with associated internal adjustments.

**Impact on Listed Building Fabric**

The proposed works comprise:

- The replacement of the previously approved 4 no. external ventilation penetrations with 2 no. ventilation penetrations of revised size, incorporating metal louvres.
- The removal of the existing modern glazed partition with a glass door in the entrance between grids G10–F10, forming part of the contemporary installation elements, to accommodate the revised secure entrance layout.
- The relocation of existing radiators within the public entrance foyer.

All elements affected are modern interventions and do not form part of the building's historic fabric. No original or significant historic features will be altered or removed as part of these works.

**Methodology**

All works will be undertaken with appropriate care to protect adjacent historic fabric. Any interventions will be carried out using standard construction techniques suitable for listed buildings, ensuring minimal disturbance to surrounding materials and finishes.

**Materials**

- Ventilation penetrations will incorporate metal louvres consistent with the previously approved design.
- The partition to be removed is of modern glass and framing construction.
- Existing radiators will be carefully relocated without impact to historic fabric.

The proposed amendments are minor in nature, relate solely to contemporary elements, and are fully reversible. The proposals will result in no harm to the significance of the Grade II listed Reading Crown Court and will preserve its character, appearance and setting.
