

WASTE MANAGEMENT PLAN: BLUE COLLAR CORNER

Blue Collar aims to minimise their impact on the environment, promoting good waste management practice, mitigating environmental impact, reducing use of natural resources and preventing pollution. The policy sets out their approach to managing their environmental impact from waste.

Blue Collar will:

- Create a purpose-built bin store (sized 5.5m x 3.2m) with base, cladded plastic (wipeable) walls, vinyl (wipeable) flooring, ramp, locks, doors with self closers and roof. This has been designed specifically to prevent pest issues arising from overgrown greenery next door to the venue and the derelict Eva's building opposite
- Ensure compliance with all environmental legislation applicable to their business and operation
- Ensure that any waste created through the business will be disposed of in a safe and environmentally friendly manner
- Maintain a commercial contract for bin collection. This collection includes general waste, recycling, food waste and glass collection
- Maintain a commercial contract with Pest UK for pest prevention
- A cleaning log will be kept by staff, ensuring that the waste is disposed of correctly and bin store cleanliness is maintained. Once a week, a deep clean of the bin store will take place
- Trained staff will manage and maintain venue cleanliness by clearing tables regularly and bins are positioned throughout Blue Collar Corner to enable customers to dispose of their own waste and avoid taking with them
- The area outside the venue (including visible rubbish in gutters and footpaths surrounding Blue Collar Corner) will also be collected and disposed of in our bins
- Food businesses within Blue Collar Corner dispose of their waste in our bins and are trained on separately their rubbish accordingly between general waste, recycling, food waste and glass collection
- Ensure that waste bins are provided for customers close to the exit doors and made visible with clear signage so that customers are encouraged to dispose of their waste at the venue rather than take it with them
- Bung Plugs will be fitted in the bins to avoid build up, avoid rats, and enable effective cleaning of bins, examples of these are below:

SULO Wheelie Bin Drainage
Bung - 1100 Ltr

SULO Wheelie Bin Drainage
Bung - 660/770 Ltr

Blue Collar will store commercial waste bins to the rear of the venue as shown on the plans. Securely locked with wheelie bin keys (kept locked at all times). The bins cover all public waste, bar waste and food trader waste and are as follows:

- 5 x 1100L general waste bins
- 2 x 1100L recycling bins
- 3 x 240L food (compostable) waste bins
- 2 x 240L glass bins

General waste and glass will be collected by Biffa on Fridays. Food waste and recycling will be collected by Biffa every Thursdays. All waste will be collected on site within the designated waste area.

If increase waste volumes occur (for example busy periods) then additional waste collection can be quickly arranged with Biffa.

In addition, specialty waste, such as oil receptacles will be disposed of weekly. Waste oil will be collected by Cater Oils and Olleco. A waste transfer notice is sent via email after collection.
