

Key

- Existing random flintwork to arched panels between buttresses: localised/isolated defective mortar pointing and individual loose/detached and/or dropped flints. Rake out and repoint defective mortar pointing to flintwork. Remove loose/detached individual flints. Reinstall removed/dropped flints in former positions bedded and pointed in lime mortar.
- Rake and repoint defective/open mortar joints to stonework to buttress. Point with lime mortar

01 SOUTH ELEVATION: Repairs
1:50

Damaged buttress: vehicle impact damage has displaced individual stones, including the lower plinth and offset: Allow for dismantling the whole of the buttress 100% and rebuilding to match existing on a 'like for like' basis. Existing salvaged stones to be bedded and pointed in lime mortar in their former positions
