

Active Play: Drop Rope Tightrope Crossing

The Drop Rope Tightrope Crossing presents the optimal outdoor-play opportunity not only for physical development, but also for building children's confidence, self-esteem, and ability to assess and take risks safely.

The main mission-possible (should they choose to accept it!) presents a risk element - it creates a situation where children have to think strategically about what they need to do, how to approach it and how to place themselves, in order to make their way across successfully. Good luck!
